⭕ *Task02 : Remote Repositories in GIT*

- Checking our origin through remote -v

```
 /mnt/d/Github/Deep-Learning-BWF-FaiqKhan    on git  master !2 ?2
 git remote -v
origin  git@github.com:MFaiqKhan/BytewiseFellowShip-BWT_DeepLearning.git (fetch)
origin  git@github.com:MFaiqKhan/BytewiseFellowShip-BWT_DeepLearning.git (push)
```

- Adding a remote to our local repo having existing remote

```
 /mnt/d/Github/Deep-Learning-BWF-FaiqKhan    on git  master !2 ?2
 git remote -v
crash-course-remote     https://github.com/MFaiqKhan/bytewiseremote.git (fetch)
crash-course-remote     https://github.com/MFaiqKhan/bytewiseremote.git (push)
origin  git@github.com:MFaiqKhan/BytewiseFellowShip-BWT_DeepLearning.git (fetch)
origin  git@github.com:MFaiqKhan/BytewiseFellowShip-BWT_DeepLearning.git (push)

 /mnt/d/Github/Deep-Learning-BWF-FaiqKhan    on git  master !2 ?2
```

- Inspecting Remote data

```
  contact-form                d64f071 added stash
* master                      0e52b12 added pdf and readme file
  remotes/origin/contact-form d64f071 added stash
  remotes/origin/master       0e52b12 added pdf and readme file
(END)
```

- Inspecting changes before integrating into the remote repo
